AWS INFRASTRUCTURE DEPLOYMENT REPORT

1. EXECUTIVE SUMMARY

Our primary ecosystem server has been successfully configured and launched on Amazon Web Services (AWS) in the Europe (Frankfurt) eu-central-1 region.

The infrastructure is tailored to support our multi-module ecosystem, containerized microservices (Docker), PostgreSQL database, and high-traffic platform needs.

2. SERVER TECHNICAL DETAILS

PARAMETER	CONFIGURATION DETAILS
Server Name	ecosystem-core-prod
Operating System	Ubuntu 24.04 LTS (64-bit x86)
Instance Type	t3.medium (2 vCPUs, 4 GiB Memory)
Storage	30 GiB Root Volume (gp3 High-Performance SSD)
AWS Region	Europe (Frankfurt) eu-central-1
Public IPv4 Address	18.197.18.157
Private IP Address	172.31.34.60
SSH Key Pair Name	ecosystem-key (ecosystem-key.pem)

NETWORK & SECURITY CONFIGURATION (SECURITY GROUP):

- * SSH (Port 22) : Restricted / Management Access
- * HTTP (Port 80) : Open (0.0.0.0/0) for web traffic
- * HTTPS (Port 443): Open (0.0.0.0/0) for SSL/TLS encrypted traffic

3. ESTIMATED MONTHLY COST (AWS BILLING)

RESOURCE	CONFIGURATION	ESTIMATED MONTHLY COST
EC2 Instance	t3.medium (730 hrs/mo)	~\$30.00 USD (110.18 AED)
Storage (EBS)	30 GB gp3 SSD	~\$2.88 USD (10.58 AED)
Public IPv4	Amazon Assigned Public IP	~\$3.65 USD (13.41 AED)
TOTAL ESTIMATED		(134.17) AED / month

*Note: Live usage metrics will populate on the AWS Billing Dashboard within 24-48 hours.

4. ACCESS CREDENTIALS & ACCOUNT MANAGEMENT

[CONFIDENTIAL]

A. ROOT AWS ACCOUNT (MASTER CREDENTIALS)

Console Login URL : <https://signin.aws.amazon.com/console>

Root Email : info.jovianex@gmail.com

Password : 63_('myU|N5F.v:

B. DEVELOPER IAM USER ACCOUNT (OPERATIONAL ACCESS)

AWS Account ID : 675628601387

IAM Sign-in URL : <https://675628601387.signin.aws.amazon.com/console>

IAM Username : developer-admin

Temporary Password: 1e8V8#X!

C. SSH PRIVATE KEY ACCESS

Key Pair File : ecosystem-key.pem

Terminal Command : ssh -i "ecosystem-key.pem" ubuntu@18.197.18.157
